EDUCATION

University of San Jose-Recoletos | Cebu City, PH Expected: **June 2027**

Bachelor of Science in Computer Science, Major in Artificial Intelligence and Web Development

- **Thesis** *(in progress)*: MAVIA: Audio-tactile Adaptive Learning System for Blind and Visually Impaired (BVI) via Reinforcement Learning
- **DOST-SEI RA 7687 Scholar**
- **Relevant Courses:** Data Structures & Algorithms, Software Engineering 1 & 2, Information Management (Databases), Operating Systems, Computer Organization & Architecture, Data Communications & Networking, Automata Theory & Formal Languages, Machine Learning, Intelligent Systems, Fundamentals of Cybersecurity
- **Honors:** Consistent Dean's Lister (1st Semester, A.Y. 2023 - 2024 to Present)

Calatrava Senior High School -Stand Alone | Brgy. Bantayanon, Calatrava, Negros Occidental **July 2023**

Senior High School Diploma

- **Honors:** With Highest Honors

TECHNICAL SKILLS

Languages: C, Python, PHP, Java, JavaScript, SQL

Frameworks & Libraries: Django REST Framework, Laravel, React, Angular, OpenCV, MediaPipe, scikit-learn

Tools & Platforms: Git / GitHub, MySQL, Apache, Figma, Canva

EXPERIENCE

University of San Carlos – 3rd Core-to-Core Biosymposium 2026 | Cebu City, PH **June 2026 – October 2026**

Freelance Web Developer

- Built the conference's official website with **React** and **Django**, handling registration, payment verification, and abstract submissions for 31 delegates from 3 countries.
- Built an admin console that the organizing committee used to review abstracts, confirm payments, export registrant lists, and update the program, speakers, and announcements.
- Automated confirmation and decision emails for registrations, payments, and abstracts.

University of San Carlos – Applied Microbiology Laboratory | Cebu City, PH **January 2026 - February 2026**

Freelance Web Developer

- Built an equipment booking system with **PHP** and **MySQL** that is still in use.
- Delivered conflict-free scheduling that blocks double-bookings and reservations during equipment maintenance, plus a staff dashboard to approve or reject requests with automatic email updates to users.

PROJECTS

iPBL 2026: Autonomous Quadruped Challenge | *International Project-Based Learning* **August 2026**

- Selected as a USJ-R delegate to a 5-day international program with Southern Taiwan University of Science and Technology and Osaka Institute of Technology, working in a 6-member team with 2 students from each school.
- Co-developed the robot's vision and navigation, enabling it to autonomously follow green and red markers and avoid obstacles using **Python** and **OpenCV** on a **Raspberry Pi**, and adapted an **Arduino Nano** gait controller to drive 12 servos.

SALITAyo | *Natural Language Processing* **May 2026**

- Co-developed a bilingual (English/Filipino) reading and writing assistant for dyslexic learners in a 3-person team, and led the Writing Assistant component.
- Fine-tuned a **T5-small model** on 22,000+ misspellings to rank spelling corrections (85.8% top-1 accuracy), and trained a **RandomForest classifier** that sorts errors into 5 dyslexia-related types (0.98 weighted F1).
- Built the Writing Assistant with **Django REST Framework** and **React**, which suggests spelling corrections, checks learners' writing against reference passages, and supports Filipino and Taglish text through **DeBERTa-v2** and **LLaMA 3.3**.

AAIMS: Automated Academic Integrity Monitoring System | *Graphics and Visual Computing* **May 2026**

- Built a real-time exam proctoring app in **Python** that flags head turns, face absence, and talking using only a standard webcam.
- Implemented head pose and face presence detection with **OpenCV** and **MediaPipe FaceMesh**, and trained an **SVM classifier** on 1,000 self-collected samples to detect talking from mouth movement.
- Added per-student calibration to reduce false alarms, and a proctor dashboard with live alerts and exportable logs of flagged events.

JoseniCare | *Software Engineering 1* **October – December 2025**

- Co-developed a campus health and emergency response system in a 3-person team, linking students, the university clinic, and campus security through a **Flutter** mobile app and a **PHP** web portal.
- Built the clinic staff and doctor modules for patient records, medical inventory, and health surveys with **PHP** and **MySQL**, and designed the **Figma** screens for the staff, doctor, login, and SOS alert flows.

CERTIFICATIONS, LEADERSHIP & AWARDS

Certifications

- **TOPCIT** (**Test of Practical Competency in ICT**) – Level 2, Score 367 (July 2026)

Leadership

- **3rd Year Governor** - Information and Computer Technology Organization, USJ-R (A.Y. 2025-2026)
- **Computer Science Representative** - DOST Scholars' Association, USJ-R (2024-2026)

Awards & Competitions

- **Top 5 Finalist** – Philippine Startup Challenge XI, Central Visayas Regional Competition, pitching MAVIA; 25 finalists from 243 entries across 23 schools (October 2026)
- **1st Runner-Up** - PSITE Central Visayas Innovation Challenge: AI Innovation for Financial Inclusion (2026)
- **Top 15 Finalist & Philippine Representative** – 4th Bangkok University x Berkeley SkyDeck Fund Hackathon (2026)
- **Top 5 Finalist** – CESAFI Computer Quiz Bowl (2026)
- **Top 8 Finalist** – EO Philippines South Lead 2 Lead Student Leaders Entrepreneurship Congress (2026)
